Annual Financial Statements for the year ended 30 June 2014

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2015 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 4.

The annual financial statements set out on pages 4 to 76, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2014 and were signed on its behalf by:

M.P. Bokgwathile Accounting Officer

Kuruman 31 August 2014

Annual Financial Statements for the year ended 30 June 2014

Accounting Officer's Report

The accounting officer submits her report for the year ended 30 June 2014.

1. Review of activities

Main business and operations

The municipality is engaged as a district municipality performing the functions as set out in the constitution (act no 105 of 1996) and operates principally in South Africa.

The operating results and state of affairs of the municipality are fully set out in the attached annual financial statements and do not in our opinion require any further comment.

2. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

4. Accounting Officer's interest in contracts

The accounting officer does not have an interest in any of the contracts entered into during the current financial year.

5. Accounting policies

The annual financial statements prepared in accordance with the South African Statements of Generally Accepted Accounting Practice (GAAP), including any interpretations of such Statements issued by the Accounting Practices Board, and in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

6. Non-current assets

No major changes in the nature or the policy relating to the use of the non-current assets of the municipality occurred during the year.

7. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name Nationality
M.P. Bokgwathile South Africa

8. Bankers

Accounts were held with Absa Bank Limited and Standard Bank Limited during the year.

9. Auditors

Auditor General of South Africa will continue in office for the next financial period.

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with the historical cost convention as the basis of measurement, unless otherwise stated. They are presented in South African Rand. Amounts included in the annual financial statements have been rounded to the nearest Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period, unless otherwise stated.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts presented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Impairment of Receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Impairment testing

The recoverable amounts of cash-generating units and individual assets are determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

Provisions

Provisions are raised and management determines an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note - Provisions.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that is used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 16.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Allowance for doubtful debts

An allowance for doubtful debts is recognised in surplus and deficit. As a result of a new policy adopted by the municipality during the current year, the allowance is measured by categorising debtors into low, medium and high risk categories at the end of each year, and then applying percentages based on the risk category and ageing of each debtor. Risk categories are identified by the percentage of debt recovered from the debtor during the year. No allowance for bad debts is calculated on government and municipal debt. In prior periods, judgement was used to calculate allowance for bad debts, as no policy was implemented to specify a method to be used.

1.3 Biological assets

The municipality recognises a biological assets that form part of an agricultural activity or agricultural produce when, and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets are measured at their fair value less costs to sell.

The fair value of livestock is determined based on market prices of livestock of a similar age, breed, and genetic merit.

The fair value of the vine / pine plantations is based on the combined fair value of the land and the vines / pine trees. The fair value of the raw land and land improvements is then deducted from the combined fair value to determine the fair value of the vines / pine trees.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate, where applicable, is used to determine fair value.

Unconditional government grants related to biological assets that form part of an agricultural activity are recognised as income when the grants become receivable.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

1.4 Investment property

Investment property is property (land and / or buildings and / or portion of a building) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes, and is therefore not classified as investment property.

Investment property is recognised as an asset when, and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.4 Investment property (continued)

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model until disposal of the investment property.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when, and only when:

- the entity controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset, a monetary asset, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at its fair value. If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Recognition of costs of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.5 Property, plant and equipment (continued)

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

The cost of day-to-day servicing are not recognised in the carrying value of an item of property, plant and equipment. These repairs and maintenance costs are recognised in surplus or deficit as they are incurred.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised when the costs of the new inspection are recognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses, except for Land, Buildings and Community assets which are carried at revalued amounts, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

It is the policy of the municipality to revalue the Land, Buildings and Community assets once every five years. Management is of the opinion that this is sufficiently regular to ensure that the carrying value does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent that it eliminates any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life	Average useful life - as previously stated
Buildings	30 years	30 years
Community assets		
• Land	Indefinite	Indefinite
Buildings	20 - 30 years	20 - 30 years
Furniture and fixtures	5 - 30 years	5 - 30 years
IT equipment	5 - 30 years	3 - 30 years
Land	Indefinite	Indefinite
Leased assets		
Office equipment	3 - 5 years	3 years
Cell phones	2 - 3 years	2 years
Motor vehicles	5 - 12 years	3 - 20 years
Office equipment	5 - 30 years	3 - 30 years
Other property, plant and equipment	2 - 22 years	2 - 22 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.5 Property, plant and equipment (continued)

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.6 Intangible assets

An asset is identifiable if it:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when, and only when:

- the entity controls the asset as a result of past events:
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Seperately acquired intangible assets are initially measured at cost.

The cost includes the purchase price, including import dutires and non-refundable purchase taxes, after deducting trade discounts and rebates, as well as any other directly attributable costs of preparing the asset for its intended use.

Recognition of costs of an intangible asset ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following can be demonstrated:

- it is technically feasible to complete the asset so that it will be available for use or sale,
- there is an intention to complete and use or sell it,
- there is an ability to use or sell it,
- it will generate probable future economic benefits or service potential,
- there are available technical, financial and other resources to complete the development and to use or sell the
 asset, and
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.6 Intangible assets (continued)

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For intangible assets that are regarded as having finite useful lives, amortisation is provided on a straight line basis over the useful lives.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeComputer software, internally generated5 - 10 yearsComputer software, other5 years

Intangible assets are derecognised:

- on disposal: or
- · when no future economic benefits or service potential are expected from its use or disposal.

1.7 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An inalienable item is an asset that a municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

A heritage assetis recognised when, and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Heritage assets are measured at cost on initial recognition.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

The municipality assess at each reporting date whether there is an indication that a heritage asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.7 Heritage assets (continued)

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Cash and cash equivalents

Consumer debtors

Receivables from exchange transactions

Receivables from non-exchange transactions

Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Unspent conditional grants and receipts

Consumer deposits

Payables from exchange transactions

Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value [if subsequently measured at fair value].

The entity first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the entity analyses a concessionary loan into its component parts and accounts for each component separately. The entity accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Short term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms in the public sector, either through established practices or legislation.

Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- a combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the entity cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed either directly or by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived:
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset: or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the municipality transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognise either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the municipality has retained substantially all the risks and rewards of ownership of the transferred asset, the municipality continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the municipality recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The municipality derecognises a financial liability (or a part of a financial liability) when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.10 Non-current assets held for sale and disposal groups

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when all the following are applicable:

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.10 Non-current assets held for sale and disposal groups (continued)

- The sale is highly probable,
- The asset (or disposal group) is available for immediate sale in its present condition,
- Management is committed to the sale, and
- The sale is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

1.11 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.11 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that it is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.12 Net assets

Net assets are the residual interest in the assets of the municipality, after deducting all of its liabilities.

1.13 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

The expected cost of the bonuses (thirteenth cheques) is recognised as an expense as the employees render services that increase their entitlement. The municipality does not pay any incentive or performance bonuses.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.13 Employee benefits (continued)

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Other post retirement obligations

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Provisions and contingencies (continued)

A constructive obligation to restructure arises only when an municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented: and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality.

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

Contingent liabilities, that are seperately recognised in entity combinations, are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 43.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- · financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, a municipality recognises the obligation at the higher of:

- the amount determined in accordance with the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Provisions and contingencies (continued)

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability
 exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the municipality consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the municipality test the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy and 1.11.

If the related asset is measured using the revaluation model:

- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;
- in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the asset been carried under the cost model, the excess is recognised immediately in surplus or deficit;
- a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying
 amount does not differ materially from that which would be determined using fair value at the reporting date. Any
 such revaluation is taken into account in determining the amounts to be taken to surplus or deficit and net assets.
 If a revaluation is necessary, all assets of that class is revalued; and
- the Standard of GRAP on Presentation of Financial Statements requires disclosure on the face of the statement of changes in net assets of each item of revenue or expense that is recognised directly in net assets. In complying with this requirement, the change in the revaluation surplus arising from a change in the liability is separately identified and disclosed as such.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.15 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.15 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.16 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Government grants

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, which-ever is earlier.

When government remit grants on a re-imbursement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

Revenue received from conditional grants, donations and fundin are recognised as revenue to the extent that the municipality has complaied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised.

1.17 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.18 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.19 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.20 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.21 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.21 Fruitless and wasteful expenditure (continued)

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance in the period incurred and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register and in a seperate note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register and in a seperate note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

1.23 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.24 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2013/07/01 to 2014/06/30.

The budget for the economic municipality includes all the entities' approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.25 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.26 Events after the reporting date

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting period); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality adjusts the amounts recognised in its financial statements to reflect adjusting events after the reporting date.

The municipality does not adjust the amounts recognised in its financial staetments to reflect non-adjusting events after the reporting date. The municipality discloses the nature and estimate of financial effect for all material categories of non adjusting events after the reporting period.

1.27 Expenditure

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrences of liabilities that result in decreases in net assets, other than those relating to distributions to owners, and are only recognised when the value of these outflows or consumptions of assets or incurrences of liabilities can be reliably measured. Under the accrual basis, expenses are recognised when they occur, and not only when cash or its equivalent is paid.

Items included in this category consists of personnel costs, remuneration of councillors, grants and subsidies paid and general expenses.

1.28 Commitments

Commitments disclosed in the notes to the Annual Financial Statmenets relate to unrecognised commitments entered into before year end.

These commitments were authorised and entered into, but did not satisfy the recognition criteria or definitions of any of the elements of the Annual Financial Statements before year end.

1.29 Value-added tax (VAT)

The municipality accounts for value-added tax (VAT) on the invoice basis.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.30 Prior period errors

Material prior period errors are corrected retrospectively in the first set of financial statements authorised for issue after their discovery, except to the extent that it is impracticable to determine the period specific effects or the cumulative effect of the error.

When it is impracticable to determine the period specific effects, the opening balances of the relevant assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

When it is impracticable to determine the cumulative effect, the entity shall restate the relevant balances to correct the error prospectively from the earliest date practicable

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand 2014 2013

2. New standards and interpretations

2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2014 or later periods:

GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
 - has control or joint control over the reporting entity;
 - has significant influence over the reporting entity;
 - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
 - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
 - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
 - both entities are joint ventures of the same third party;
 - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
 - the entity is controlled or jointly controlled by a person identified in (a); and
 - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- · Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

Control;

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

- Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2014.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP32: Service Concession Arrangements: Grantor

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister set the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP108: Statutory Receivables

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister set the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

IGRAP17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister set the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 5 (revised 2013): Borrowing Costs

Benchmark treatment is to recognise borrowing costs as an expense.

Allowed alternative is to capitalise borrowing costs if it is attributable to the acquisition, construction or production of a qualifying asset. All other instances, expense borrowing costs.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2014.

The municipality expects to adopt the amendment for the first time in the 2015 annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

GRAP 100 (revised 2013): Discontinued Operations

All accounting, presentation and disclosure requirements with regards to non-current assets held for sale (or disposal groups) have been deleted. The impact of the amendments is:

- Will no longer be required to reclassify assets as held for sale. GRAP 100 now only deals with discontinued operations.
- Certain disclosure must be made if, at the reporting date, management has taken a decision to dispose of a significant asset or a group of assets and liabilities. Will fall under the Standard of GRAP on Presentation of Financial Statements.
- Additional text

Measurement requirements are to be applied prospectively and presentation and disclosure requirements are to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2014.

The municipality expects to adopt the amendment for the first time in the 2015 annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

2.2 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2014 or later periods but are not relevant to its operations:

GRAP 12 (as revised 2012): Inventories

Paragraph .30 was amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Measurement after recognition.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality does not envisage the adoption of the amendment until such time as it becomes applicable to the municipality's operations.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

The aggregate impact of the initial application of the statements and interpretations on the municipality's annual financial statements is expected to be as follows:

3. Receivables from exchange transactions

Deposits	348	608
Employee costs in advance	200	450
Trade receivables	7 228 921	7 143 274
	7 229 469	7 144 332

Consumer receivables are are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of consumer debtors are not performed in terms of GRAP 104 on initial recognition.

Information on the amount of births and deaths is not available, counts are only performed at year end.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Pledged as security

Carrying value of biological assets is not pledged as security:

Methods and assumptions used in determining fair value

The fair value represents the market values for biological assets that are traded on active markets in the Northern Cape.

Notes to the Annual Financial Statements

Figures in Bond	2014	2013
Figures in Rand	2014	2013

7. Biological assets (continued)

Prior period error

In the prior year, it was noted that the municipality had biological assets on land owned. However, these assets were not seperately disclosed on the Statement of Financial Position. A count was performed at the end of the prior year, the assets were valued and transferred from Property, plant and equipment to disclose seperately. The count performed at the end of the prior year was the first count performed, and no records are available to indicate how many of the biological assets were held before then, in order to calculate the value of the assets before the end of the prior year. The prior period error was therefore correct prospectively in the prior year, as it is not practicable to determine the value of the assets before that date.

Figures in Rand	2014	2013
rigules ili Raliu	2014	2013

11. Heritage assets (continued)

Other information

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

12. Discontinued operations or disposal groups or non-current assets held for sale

John Taolo Gaetsewe District Municipality provided services to District Management Areas under their control. These areas were transferred by a section 12 notice by the MEC of Cooperative Governance and Transitional Affairs to Local B-Municipalities. Since 30 June 2011, John Taolo Gaetsewe District Municipality no longer has control over these District Management Areas and no longer provides any services to these areas. The assets and liabilities of the disposal group are set out below.

The non-current assets were sold on a piecemeal basis.

Surplus / Deficit

Other income	7 778	31 387
Assets and liabilities		
Non-current assets held for sale Property, plant and equipment		225 002
13. Finance lease obligation		
Minimum lease payments due - within one year - in second to fifth year inclusive - later than five years	437 823 1 580 490 1 185 368	399 124 1 596 493 1 727 514
less: future finance charges	3 203 681 (993 405)	3 723 131 (1 141 891)
Present value of minimum lease payments	2 210 276	2 581 240
Non-current liabilities Current liabilities	2 019 699 190 577 2 210 276	2 413 747 167 493 2 581 240

The period of the loan is 15 years and the average effective borrowing rate was 9.64 % (2013: 9.64%) compounded biannually.

Interest rates are fixed at the contract date. All leases have fixed repayments, which are made bi-annually, and no arrangements have been entered into for contingent rent.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand	2014	2013
14. Payables from exchange transactions		
Trade payables	4 330 397	433 216
Payments received in advanced	118 843	112 027
Compensation for injuries on duty contribution	1 074 000	724 000
Accrued leave pay	1 805 863	1 704 550
Accrued bonus	1 113 996	1 385 651
Accrued expenses	148 880	300 812
Retention creditors	3 730	-
	8 595 709	4 660 256

Payables are being recognised net of any discounts.

Payables are being paid within 30 days as prescribed by the MFMA. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of trade and other payables on initial recognition is not deemed necessary.

All payables are unsecured.

15. VAT payable

VAT payable - 1 170 742

16. Employee benefit obligations

Other long-term employee benefits obligation

The plan is a post retirement health care benefit plan.

The amounts recognised in the statement of financial position are as follows:

Carrying value		
Present value at the beginning of the year	21 776 320	20 100 046
Net actuarial gains or losses not recognised	2 480 576	162 411
Contributions to provision	55 928	(39 827)
Interest cost	1 763 677	1 553 690
	26 076 501	21 776 320
Non-current liabilities	24 992 865	20 921 944
Current liabilities	1 083 636	854 376
	26 076 501	21 776 320

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	8.87 %	8.26 %
Expected rate of return on assets	8.09 %	7.84 %
Expected rate of return on reimbursement rights	0.72 %	0.39 %

Mortality rates are determined by the PA 90 ultimate table, rated down by 1 year of age used by actuaries.

The normal retirement age for employees of the municipality is 63 years.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand	2014	2013

16. Employee benefit obligations (continued)

Other assumptions

The liability in respect of the current and previous four years are as follows:

	2014	2013	2012	2011	2010
	R	R	R	R	R
In-service members	10 973 679	9 357 089	7 822 664	7 042 263	5 601 924
Continuation members	15 102 822	12 419 231	12 277 382	11 410 900	8 743 813

Defined contribution funds

Council members contribute to the Municipal Council Pension Fund which is a defined contribution fund. The retirement benefit fund is subject to the Pension Fund Act, 1956, with pensions being calculated on the pensionable remuneration paid. Current contributions by Council members are charged against expenditure on the basis of current service costs.

Contributions paid recognised in the Statement of Financial Performance:

Municipal councillors pension fund	483 418	1 125 585
------------------------------------	---------	-----------

Cape Joint Pension Fund

The contribution rate payable by the members and the council is 9% and 18% respectively.

Contributions paid recognised in the Statement of Financial Performance	49 112	44 914
---	--------	--------

Cape Joint Retirement Fund

The contribution rate payable by the members and the council is 9% and 18% respectively.

Contributions paid recognised in the Statement of Financial Performance	5 061 463	4 047 003
---	-----------	-----------

17. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprises of:

Unspent conditional	arants	and	receipts
---------------------	--------	-----	----------

Local Government Financial Management Grant (FMG)	183 935	480 661
Municipal Systems Improvement Grant (MSIG)	-	1 643 621
Expanded Public Works Programme Grant (EPWP)	2 941 024	269 986
Housing Accreditation	42 193	1 350 407
Near Grant	443 959	213 953
Fire Grant	690 000	390 000
Vanzylsrus Sportfield	479 962	479 962
HIV Aids Council	185 495	98 095
Infrastructure Skill Development	1 276 019	2 000 000
Rural Road Asset Management Grant	10 673	-
	6 253 260	6 926 685

The Unspent Grants are cash-backed by term deposits. The municipality complied with the conditions attached to all grants received to the extent of revenue recognised.

These amounts are invested in a short-term investment until utilised.

29. Government grants and subsidies (continued)		

Equitable Share

Equity share

Current-year receipts	57 741 999	55 360 893
Conditions met - transferred to revenue	(57 741 999)	(55 360 893)
Net of unspent/(unpaid) grants	-	-

In terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members.

The Equitable Share is the unconditional share of the revenue raised nationally and is being allocated in terms of Section 214 of the Constitution (Act 108 of 1996) to the municipality by the National Treasury.

Financial Management Grant (FMG)

Balance unspent at beginning of year	480 661	211 311
Current-year receipts	1 250 000	1 250 000
Conditions met - transferred to revenue	(1 546 726)	(980 650)
Net of unspent/(unpaid) grants	183 935	480 661

The Financial Management Grant is paid by National Treasury to municipalities to help implement the financial reforms required by the Municipal Finance Management Act (MFMA), 2003. The Financial Management Grant also pays for the cost of the Financial Management Internship Programme (e.g. salary costs of the Financial Management Interns).

Municipal Systems Improvement Grant (MSIG)

Net of unspent/(unpaid) grants	(2 333 021)	1 643 621
Conditions met - transferred to revenue	(2 533 621)	(456 512)
Current-year receipts	890 000	1 000 000
Balance unspent at beginning of year	1 643 621	1 100 133

The Municipal Systems Improvement Grant was used for building in-house capacity to perform municipal functions and stabilise institutional and governance systems.

Housing Accreditation

Balance unspent at beginning of year	1 350 407	1 350 407
Current-year receipts	1 084 765	-
Conditions met - transferred to revenue	(2 392 979)	-
Net of unspent/(unpaid) grants	42 193	1 350 407

The Housing grant was utilised for the development of erven and the erection of top structures. This is a multi-year project, and the balance of the grant will be utilised in the subsequent years. Commitments of R671 931 were entered into before year end in relation to this grant.

Library Grant

Balance unspent at beginning of year	(75 194)	-
Current-year receipts	75 194	102 000
Conditions met - transferred to revenue	-	(177 194)
Net of unspent/(unpaid) grants	-	(75 194)

The Library grant was used to finance library activities.

Balance unspent at beginning of year	269 986	117 848
Current-year receipts	3 499 891	1 000 000
Conditions met - transferred to revenue	(828 853)	(1 074 009)
Other - written off	-	226 147
Net of unspent/(unpaid) grants	2 941 024	269 986

The grant was used for debushing, fencing of graveyards as well as to address issues of unemployment as it is labour intensive. The grant was received late in the year and the project was only started in May 2014. Therefore the municipality will therefore continued to utilise the grant subsequent to year end and commitments to the value of R746 148 were already entered into before the end of the year.

Rural Transport

Net of unspent/(unpaid) grants	10 673	
Other - Recovered by National Tresury	-	(1 503 894)
Conditions met - transferred to revenue	(1 454 327)	-
Current-year receipts	1 465 000	-
Balance unspent at beginning of year	-	1 503 894

This is the allocation by the Department of Transport in the Northern Cape to maintain the roads function on behalf of the Department of Transport.

Vanzylsrus Sportfield

Balance unspent at beginning of year	479 962	-
Current-year receipts	-	751 650
Conditions met - transferred to revenue	-	(271 688)
Net of unspent/(unpaid) grants	479 962	479 962

The grant was used to build a sportfield at Vanzylsrus. The unspent portion is for maintenance and is ongoing.

43. Contingencies

A former employee of the municipality, B M Olivier, accused the municipality of breaching the terms of the employment agreement with regard to the termination benefits.

During the current year, the case was settled in the Labour Court. In terms of the agreement reached, the municipality paid R1 000 000 to B M Olivier. Therefore, no further disclosure of a contingent liability with regards to this case is necessary.

No other contingent liabilities have been identified.

2014 2013 Severance Benefit - B M Olivier - 6 761 291

45. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, municipality treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Long-term liabilities	year	2 years 399 124	5 years	•

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counterparty.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2014	2013
Receivables from exchange transactions	4 014 406	3 012 929
Receivables from non-exchange transactions	3 469 342	152 503
Cash and cash equivalents	34 617 217	37 658 659

Market risk

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. Municipality policy is to maintain approximately 100% of its borrowings in fixed rate instruments. During 2014 and 2013, the municipality's borrowings at variable rate were denominated in the Rand.

The municipality analyses its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration refinancing, renewal of existing positions, alternative financing and hedging. Based on these scenarios, the municipality calculates the impact on surplus and deficit of a defined interest rate shift. For each simulation, the same interest rate shift is used for all currencies.

Price risk

The municipality is not exposed to price risk

46. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

47. Events after the reporting date

Management is not aware of any events after the reporting date.

48. Unauthorised expenditure

Opening balance	385 206	5 587 123
Unauthorised expenditure current year	5 058 328	385 206
Less: Unauthorised expenditure condoned by council	-	(5 587 123)
	5 443 534	385 206

Unauthorised expenditure is a result from over expenditure of the approved budget and no disciplinary steps or criminal proceedings have been undertaken.

The balance of the unauthorised expenditure at the beginning of the prior year has been condoned by council.

49. Fruitless and wasteful expenditure

Opening balance Fruitless and wasteful expenditure current year	991 816 1 036 773	766 435 225 381
Less: Fruitless and wasteful expenditure condoned by council	(870 104) 1 158 485	991 816

The current year fruitless and wasteful expenditure occurred for various reasons, including travel costs for travel not undertaken due to illness and courses cancelled, penalties and interest due to infringement of credit terms, printing fees while municipal printer was awaiting repair and reprinting of vehicle ownership certificates. No action was taken against the responsible persons.

The balance of the fruitless and wasteful expenditure at the beginning of the prior year has been condoned by council.

51. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

The items referred to above for the year ending 30 June 2014 are as follows:

Annual Financial Statements for the year ended 30 June 2014

52. Comparative figures

5

Certain comparative figures have been reclassified.

The municipality pays thirteenth cheques to employees based on their monthly salaries during November each year. As the uncertainty relating to the timing and the amount of bonuses paid after year end is low, an accrual is raised instead of a provision. The provision provided for in the annual financial statements for the prior year, to the value of R1,385,651, has therefore been reclassified as an accrual in the current year's annual financial statements.

An amount of R106,017 relating to the water monitoring done on behalf of the local municipalities has been identified as being included with the unspent grants in the prior year. The amount does not relate to grants received, and has been reclassified to be included with the payables from exchange transactions.

The Expanded Public Works Programme Incentive Grant was incorrectly split in the prior year, with a portion disclosed as Batlharos Paving. This resulted in an amount of R74 009 being disclosed as a receivable from non-exchange transactions, when it should have formed part of an unpaid grant of R117 848. This has been corrected in the current year.

The actuarial costs of R162 411 and the project costs of 4 012 713 was disclosed together with the general expenditure on the statement of financial performance during the current year.

The current portion of the employee benefit obligations of R854 376 was disclosed seperately on the statement of financial position in the current year. In the prior year this amount was disclosed with the payables from exchange transactions.

The effects of the reclassification are as follows:

Statement of financial pos	sition
----------------------------	--------

- tate in a in tall a in t		
Receivables from non-exchange transactions	(74 009)	(74 009)
Payables from exchange transactions	(637 292)	(637 292)
Current portion of employee benefit obligations	(854 376)	(854 376)
Provisions	1 385 651	1 385 651
Unspent conditional government grants and receipts	180 026	180 026

Statement of Financial Performance

General expenses	-	4 175 124
Actuarial losses	-	(162 411)
Project costs	-	(4 012 713)

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand 2014 2013

53. Changes in accounting policy

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice on a basis consistent with the prior year except for the adoption of the following:

A new policy was implemented by the municipality to calculate the allowance for doubtful debts. This policy
provides clear guidelines on the percentages to be applied to each category of debtors in order to calculate a
reliable allowance for doubtful debts. This resulted in an adjustment of the allowance for doubtful debts of
R656,837 in the year ending 30 June 2012, and an adjustment of the allowance for doubtful debts of R3,474,565
in the year ending 30 June 2013.

The aggregate effect of the changes in accounting policy on the annual financial statements for the year ended 30 June 2013 is as follows:

Statement of financial position

Receivables from exchange transactions 4 131 403 4 131 403 Opening Accumulated Surplus or Deficit (4 131 403) (656 838)

Statement of Financial Performance

Debt impairment - (3 474 565)

54. Prior period errors

A VAT verification was performed during the current year. During the performance of the verification, input VAT amounts were identified which were not correctly accounted for and not claimed from SARS. These errors amounted to R69 489 in the prior year and R36 678 in the year ending 30 June 2012.

It was discovered that a motor vehicle included with the non-current assets held for sale, with a value of R315 137, was sold during the prior year. The proceeds were correctly accounted for, but the asset was not derecognised.

In the prior year, a change in accounting estimate was incorrectly accounted for as a prior period error instead of a change in accounting estimate. In the current year, this error was corrected. In the year ended 30 June 2012, this resulted in a decrease of depreciation and an increase of property, plant and equipment to the value of R1 280 132. In the year ending 30 June 2013, this resulted in a decrease of depreciation and an increase of property plant and equipment to the value of R227 645. After these corrections were made, it was noted that an amount of R69,385 was included in Intangible assets instead of Property, plant and equipment. This was corrected.

An amount relating to recoveries of expenses incurred for the housing projects was incorrectly treated as a grant in the prior years. This resulted in an unspent grant amount of R2 169 759 being carried forward from the prior year and R1 697 869 being carried forward from the year ending 30 June 2012. An amount of R2,664,082 was included in Recoveries, and an amount of R2,192,192 was removed from the Government grants and subsidies received

Payments of prior year expenses were also identified, for which no accrual was raised in the year ending 30 June 2013. The error amounted to R300,812.

An amount of R11,550 was identified as being treated as grants in the prior year, this was corrected to reflect as administration fees.

Per reconciliations performed to correct disclosure, and amount of R72,576 was identified as being included with employee costs instead of councillors remuneration. The amounts was corrected.

An amount of R201,380 was identified as being commission paid, but was included in employee costs in the prior year. This was corrected.

In the prior year, it was noted that the municipality had biological assets on land owned. However, these assets were not seperately disclosed on the Statement of Financial Position. A count was performed at the end of the prior year, the assets were valued and transferred from Property, plant and equipment to disclose seperately. The count performed at the end of the prior year was the first count performed, and no records are available to indicate how many of the biological assets were held before then, in order to calculate the value of the assets before the end of the prior year. The prior period error was therefore correct prospectively in the prior year, as it is not practicable to determine the value of the assets before that date.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand	2014	2013
54. Prior period errors (continued)		
The correction of the errors results in adjustments as follows:		
Statement of financial position		
Propert, plant and equipment	(983 103)	(983 103)
Intangible assets	(69 385)	(69 385)
Receivables from exchange transactions	450	450
Non-current assets held for sale	(315 137)	(315 137)
Payables from exchange transactions Unspent grants	(300 812) 2 169 759	(300 812) 2 169 759
VAT Payable	141 890	141 890
Opening Accumulated Surplus or Deficit	(643 662)	(454 415)
Statement of Financial Performance		
Recoveries	-	(2 664 082)

Government grants and subsidies	-	2 203 742
Personnel costs	-	(331 874)
Remuneration of councillors	-	72 576
Repairs and maintenance Depreciation expense	-	6 342 (227 644)
General Expenses	_	448 106

55. Actual operating expenditure versus budgeted operating expenditure

Gain on disposal of assets and liabilities

The significant differences between the budgeted and actual amounts per the Appropriation Statements are as follows:

315 137

Rental Facilities: Rental agreements were reviewed after the adjustment budget.

Interest received: A different investmet method was used and banks competed and gave better interest rates.

Administration and management fees: Shared service fees were not paid by two local municipalities.

Remuneration of councillors: The implementation of the upper limits of the remuneration of councillors per the circular.

Repairs and maintenance: Unplanned repairs and maintenance to the buildings took place, including various repairs on aircons and burglar doors and bars.

General exenses: The procurement took place late in the financial year, and were disclosed as commitments at year end.

Loss on disposal of assets and liabilities: Assets which no longer exist were identified at year end and were written off.

56. Actual capital expenditure versus budgeted capital expenditure

The significant differences between the budgeted and actual amounts per the Appropriation Statements are as follows:

Executive & Counil/Mayor and Council: Various computer equipment reached the end of its useful life, and had to be replaced. All capital expenditure is budgeted as Finance & Admin/Finance.

Community & Social/Libraries & archives: The procurement took place late in the year, and were disclosed as commitments at year end.
