This section provides a high level brief overview of the Integrated Development Plan of the District Municipality. The detail plans are discussed in Section C.
1.1 Process to compile the 2012-2017 IDP

This IDP covers the period of the current Council of the John Taolo Gaetsewe District Municipality, namely 2012-2017. Each year’s review extends the five year period and in the 2015 review extends to 2018/19. It is a product of the strategic planning process in this Municipality, also known as the Integrated Development Planning process. The Plan was developed in close cooperation and alignment with the Local Municipalities in the area, Provincial and National Departments as well as NGO’s and private institutions. This Municipality sees it as the principal strategic planning instrument, which is guiding and informing all planning, budgeting, management and decision-making of the Municipality. It must be reviewed on an annual basis. This Plan was developed in terms of the Municipal Systems Act, and its regulations, with specific reference to the Municipal Planning and Performance Management Regulations, 2001. **It is a legislative requirement with legal status, superseding all other plans that guide development in this Municipality.**

For the remaining 2 years the Municipality has to consider the 5 key performance areas for local government as directed in the 5-Year Strategic Agenda for Local Government. These are: Basic Service Delivery and Infrastructure Investment; Local Economic Development; Financial Viability and Financial Management; Good Governance and Public Participation and Municipal Transformation and Institutional Development. The Municipality added a sixth KPA: Spatial Development and Integrated Development Planning.

The strategies in the IDP must also be aligned to the national and provincial policy documents, with specific reference to the 14 National Outcomes of National Government, outlined in the Medium Term Strategic Framework of Government, which in turn is aligned to the National Development Plan: Vision 2030. The Municipality also throughout the process took a conscious decision to focus on its core powers and functions as depicted in Schedule 4 and 5 of the Constitution.

The District Growth and Development Strategy (DGDS) impacted the core of the planning process. This resulted in the IDP being aligned with the DGDS.

1.1.1 Consultation

The framework for the preparation of the IDP in the District could be explained as follows:
(1) The primary needs are obtained from the community engagements of the local municipalities through the IDP Representative Forums and IDP/Budget Road shows.

(2) The local municipalities are providing particulars of their needs and expectations for assistance to the District Municipality. These inputs are then considered and the priority issues are included in the district’s IDP.

(3) The district circulates an IDP Framework, as required in terms of section 27 of the Municipal Systems Act, 2000 on an annual basis, which is followed by an IDP Framework Workshop, at which occasion plans and planning requirements binding in terms of national and provincial legislation on the district municipality and the local municipalities or on any specific municipality are discussed and integrated; the matters to be included in the integrated development plans of the district municipality and the local municipalities that require alignment are identified; the principles to be applied and co-ordination of the approach to be adopted in respect of the matters required for alignment are specified; and consensus about procedural issues to align the district and local’s IDPs are reached.

(4) The Municipality’s IDP Steering Committee, composed of the Municipal Managers, the IDP Manager and all HODs, handles the operational decision-making regarding the flow of the IDP process and recommendations to the Council about issues that must be included in the IDP.

(5) District cluster meetings and other IGR forums are utilised to discuss IDP and related district-wide priorities.

The process of compilation of a new IDP for another five year cycle culminated into an IDP Lekgotla conducted on 9-10 February 2105.

The participation process in this Municipality depended on the participation of the Local Municipalities. This is recognized in the Process Plan of each local municipality, which decided on its own process and where necessary the District Municipality provided assistance through its Planning Centre.
1.1.2 Technical Process of compiling the IDP

Figure / Table 1: Process of compiling the IDP

The 1st phase if the situation analysis. During this phase, an analysis is done of the major development needs and gaps in the district area.

The 2nd phase is concerned with the formulation of strategies. Strategies represent the Municipality’s response to the development needs and gaps identified during the situation analysis phase.

The 3rd phase entails the identification of projects. Projects provide the management application for managing the initiatives required for implementing municipal strategies.

The 4th phase entails integrating the Municipal strategies, projects, programmes and plans into an integrated approach towards sustainable development.

1.2 Development Priorities

The results of the 2011 Census suggest that the number of people living in the district area is increasing, whilst the population of Joe Morolong is reducing. Both Gamagara and Ga-Segonyana showed population gains. This is directly related to mining related activities. This reality has far-reaching implications for the district in terms of –
JOHN TAOLO GAETSEWE DISTRICT MUNICIPALITY

- The scope and extent of the district’s spatial development framework;
- The service delivery demands put on the District Municipality, as well as the local municipalities in its area of jurisdiction; and
- The grading of the Municipalities, and thereof the resources (grants and subsidies) made available to them.

There is a need to ensure equity in the activities of the Municipality that reflects its population demographics, both in terms of service delivery, as well as in terms of employment equity. In this regard, gender, racial and disability population demographics are important. Special interest groups, such as the youth, women and persons with disabilities must focus specifically in the strategic priorities of the Municipality.

1.3 Achievements & Challenges

This section highlights selective achievements and challenges of the JT Gaetsewe DM:

**Figure / Table 2: Comparative achievements and challenges**

<table>
<thead>
<tr>
<th>Achievements</th>
<th>Challenges</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) The growth in access to electricity as a primary source of energy in the district has been spectacular. Access to electricity as a source of energy for perhaps its most vital need, namely lighting, is now at 81.76% in the District. If the current realities of the Joe Morolong Local Municipality as a rural area faced with vast distances; huge service delivery backlogs and an almost total dependency on grants and subsidies are considered, the progress made is better contextualized. Access to piped water is</td>
<td>Challenges that remain in the district are:</td>
</tr>
<tr>
<td>(1) To fill the 19% gap that remains in terms of electricity as a source of lighting.</td>
<td></td>
</tr>
<tr>
<td>(2) The clear comparative disadvantaged of the Joe Morolong Municipality in relation to the other municipalities in the district.</td>
<td></td>
</tr>
<tr>
<td>(3) The housing need in the district area remains high. The apparent growth in the percentage of informal settlements from 5.1% to 7.6% of the population is especially concerning. However, in formulating strategies to address the housing backlogs in the district, the Municipality is dependent on the guidance and initiatives of both the sector Departments of Housing, as well as of the co-operation of the local municipalities.</td>
<td></td>
</tr>
</tbody>
</table>
### Achievements

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>now at 88.86%, 97.31% and 97.28% for Joe Morolong, Gamagara and Ga-Segonyana respectively.</td>
<td></td>
</tr>
</tbody>
</table>

### Challenges

The educational levels among the population of the district are relatively low. 4% of the population has no formal education, while only 71% has some school education. Only 2% of the population has some tertiary education. These statistics have obvious implications for the employment potential of the population, and therefore also for the District’s local economic development and job creation initiatives.

(4) A total of 91618 (40.8%) people of the District’s population have no recordable income. This is extremely high and put extreme pressure on the Municipalities operating in the district. The result of such high level of unemployment is that communities cannot pay for basic services and that severe pressure is put on municipal resources due to demands for services to a poverty-stricken population.

(5) The huge discrepancies between income levels in the district are a matter of concern. In spite of the desperate levels of unemployment and poverty, 0.04% of the district’s population earns more than R200 000 per annum.

(6) Unemployment is a serious problem in the district area. 8.24% of the total population and 26% of the economically active people is unemployed. The situation is especially bad in the area of the Joe Morolong LM. The area’s job opportunities are provided by three primary economic sectors, which are agriculture, mining and retail. The other job opportunities essentially feed of these three sectors. Following the national trend, it is clear from the above-mentioned statistics that job creation must be a key priority consideration for the Municipality in formulating its strategies.
