1. Purpose

1.1 Section 13 of the National Archives and Records Service of South Africa Act, 1996 requires the John Taolo Gaetsewe District Municipality to manage its records in a well-structured record keeping system, and to put the necessary policies and procedures in place to ensure that its record keeping and records management practices comply with the requirements of the Act.

1.2 Information is a resource of the same importance to good management as other standard resources like people, money and facilities. The information resources of John Taolo Gaetsewe District Municipality must therefore be managed as a valuable asset. Appropriate records management is a vital aspect of maintaining and enhancing the value of this asset. John Taolo Gaetsewe District Municipality considers its records to be a valuable asset to:

- enable John Taolo Gaetsewe District Municipality to find the right information easily and comprehensively;
- enable John Taolo Gaetsewe District Municipality to perform its functions successfully and efficiently and in an accountable manner;
- support the business, legal and accountability requirements of John Taolo Gaetsewe District Municipality;
- ensure the conduct of business in an orderly, efficient and accountable manner;
- ensure the consistent delivery of services;
- support and document policy formation and administrative decision-making;
- provide continuity in the event of a disaster;
- protect the interests of John Taolo Gaetsewe District Municipality and the rights of employees, clients and present and future stakeholders;
- support and document the John Taolo Gaetsewe District Municipality's activities, development and achievements;
- provide evidence of business in the context of cultural activity and contribute to the cultural identity and collective memory.

1.3 Records management, through the proper control of the content, storage and volume of records, reduces vulnerability to legal challenge or financial loss and promotes best value in terms of human and space resources through greater co-ordination of information and storage systems.

JOHN TAOLO GAETSEWE
DISTRICT MUNICIPALITY
SPEAKER

2. Definitions

Archives repository:

The building in which records with archival value are preserved permanently.

Authentic records:

Authentic records are records that can be proven to be what they purport to be. They are also records that are considered by the creators to be their official record.

Authoritative records:

Authoritative records are records that are authentic, reliable, trustworthy and useable and are complete and unaltered.

Correspondence system:

A set of paper-based and electronic communications and associated documents, sent, received, generated, processed and stored during the conduct of business.

Custody:

The control of records based upon their physical possession.

Disposal:

The action of either destroying/deleting a record or transferring it into archival custody.

Disposal authority:

A written authority issued by the National Archivist specifying which records should be transferred into archival custody or specifying which records should be destroyed/deleted or otherwise disposed of.

Disposal authority number:

A unique number identifying each disposal authority issued to a specific office.

Electronic records:

Information which is generated electronically and stored by means of computer technology. Electronic records can consist of an electronic correspondence system and electronic record systems other than the correspondence system.

Electronic records system:

This is the collective noun for all components of an electronic information system, namely: electronic media as well as all connected items such as source documents, output information, software applications, programs and meta data (background and technical information i.r.o. the information stored electronically) and in hard copy. All these

components are defined as records by the Act. They must therefore be dealt with in accordance with the Act's provisions.

File plan:

A pre-determined classification plan by which records are filed and/or electronically indexed to facilitate efficient retrieval and disposal of records.

Filing system:

The collective noun for a storage system (like files, boxes, shelves or electronic applications and storage systems) in which records are stored in a systematic manner according to a file plan.

Non-archival records:

Records with a short lived interest or usefulness.

Public record:

A record created or received by a governmental body in pursuance of its activities, regardless of form or medium.

Records other than correspondence systems:
